Revolutionary new hair extensions arrive in the UK

SH August 26, 2008, 1:08 pm

Following its phenomenal success in Europe, Verlocke! hair extensions are set to launch in the UK next month.

This unique 'zip & go' technique is the first hair extension product to bond real extensions to any style of hair, using tiny compressing rings rather than hot-bonding. This means that hair is never weakened or damaged by excessive temperatures; but it's protected, resulting in shiny, full, beautiful hair.

These extensions are unbelievably easy to use and can be applied in half the time that other methods take. A full set of extensions (140 strands) can now be applied in under one hour. They require no heat, no chemicals and no fuss - and wearers are free to swim, shower, sunbathe or even relax in a sauna - everything that traditional extensions won't allow.
